HTML5 Block Level Elements: Complete List

lifeobject on January 18, 2011

Drivers (Download Here)

Update Windows 10, 8,
7 Vista, XP & Win 2000
Drivers with Driver
Turbo!

I am writing this tutorial to complete the second type of HTML elements i.e block level elements, as i have already posted [html](#) and [html5 inline elements](#) list in my previous article.

HTML5 Block Level Elements

Block-level elements place a line break before and after the element

Here is a complete list of block level selectors that can be used to style the HTML document by using the power of [CSS](#) / [CSS3](#)

* will represent Block Level Elements new in HTML5

Selector	HTML Use	Selector	HTML Use
article*	Article Content	header*	Section or Page Header
aside*	Aside Content	hgroup*	Groups Header Information
blockquote	Long Quotation	hr	Horizontal Rule
body	Page Body	li	List Item
br	Line Break	map	Image Map
button	Push Button	object	Object Embedding
canvas*	Draw Area	ol	Ordered List
caption	Table Caption	output*	Form Output
col	Table Column	p	Paragraph
colgroup	Group of Table Columns	pre	Preformatted Text
dd	Definition Description	progress*	Displays progress of time consuming task

I'm surprised to find nav and details is not on this list but on inline, nevertheless great work.

Thanks for the post. Definitely good food for thought. I don't think the following elements default to block, though: video, output, canvas, progress. Progress and output in particular seem like they would regularly be used inline (for instance, performing a look-up within a form or displaying the results of a calculation).

that is the break tag \. Also your comment section should not ignore or render tags when used inside a comment.
